SUMMARY

Hi! I'm Radek and I'm realy passionate about all things front & back end development. I care about writing clean code and I never give up with problem solvings. I genuinely love to learn. Attention to detail is my forte. During my study I encountered a lot of problems over which I spent many hours trying to find a solution and I have always been successful (some of them took long time but that teached me a lot). I'm currently looking for the right oportunity to work in an environment that will help me progress into a full-stack role.
