Portfolio | GitHub | LinkedIn

PROFILE

Full Stack Developer building web applications from frontend to backend using React and Node.js. I build AWS cloud infrastructure using Terraform and automate deployments with GitHub Actions and CI/CD pipelines. My focus is on building complete, maintainable applications and understanding the full process, from development to deployment.

EXPERIENCE

Full Stack Developer - Freelance & Personal Projects 2024 – Present

Portfolio Website | Live Demo | GitHub

- Built and deployed a full stack website on AWS, using Terraform for Infrastructure as Code (IaC)
- Set up S3, CloudFront and Route 53 to host the website and manage the domain
- Built a Node.js backend using AWS Lambda and API Gateway to handle contact form submissions
- Implemented CI/CD pipelines with GitHub Actions to automate infrastructure deployments and frontend builds across development and production environments

Car Performance Tuning Website | Live Demo | GitHub

- Rebuilt a client's WordPress website using React and Tailwind CSS, creating a responsive full stack web application stack web application using React, Tailwind CSS and Node.js
- Built a serverless AWS backend using Lambda, API Gateway, DynamoDB, S3 and SES to manage company data and contact form submissions
- Developed an admin panel with CRUD functionality and an interactive map displaying company locations, details and photos
- Managed AWS infrastructure with Terraform (IaC) and automated deployments using GitHub Actions

React Global Weather App | Live Demo | GitHub

- Developed a weather application using React, TypeScript and Styled Components, integrating Google Maps and OpenWeatherMap APIs
- Implemented location search with city suggestions, current weather and hourly and five-day forecasts
- Added support for seven languages, geolocation, Celsius/Fahrenheit conversion and light/dark themes
- Implemented error handling and Jest unit tests to improve reliability

PetShop E-Commerce Website | Live Demo | GitHub

- Built a responsive e-commerce website with HTML, JavaScript and SCSS
- Worked with a designer to turn Figma designs into a functional interface
- Configured Webpack to bundle and minify frontend assets

SKILLS

- **Frontend:** React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Sass/SCSS, Styled Components, Vite, Webpack
- **Backend:** Node.js, REST APIs
- **Cloud & Infrastructure:** AWS, Terraform, Infrastructure as Code (IaC), Lambda, API Gateway, S3, CloudFront, Route 53, DynamoDB, IAM, SES, Amplify
- **DevOps & Tools:** Git, GitHub Actions, CI/CD, Bash, Jest, Husky, lint-staged
- **Other:** Responsive Design, WCAG Accessibility, Figma

EDUCATION

BEng in Computer Science 2015
Nicolaus Copernicus University, Torun, Poland

CURRENT EMPLOYMENT

Security Team Lead 2016 – Present
ESB | Bidvest Noonan – Dublin City

- Managed a team of security officers, providing guidance and day-to-day support
- Created staff rosters and collaborated with management on daily security operations
- Improved reporting efficiency by developing Excel and VBA-based solutions
